

Shielded enclosures & racks

Electromagnetic attenuation

- Isolation of systems processing sensitive information from eavesdropping and Intentional ElectroMagnetic Interference (IEMI) threats
- Protection of computer data by isolating electronic devices: telephones, laptops, tablets, hard disk drives, servers, etc.
- For protection of legal digital evidence (forensic)
- For analysis and measurement of radio/mobile communication applications

Solutions

- Faradized racks
- Rack-type chassis (19', 20', 22' ...)
- Shielded enclosures
- High current, low current
- Filtered and coaxial feedthroughs
- Viewing window
- Faradized gloves for equipment handling
- Ventilation
- Access control
- Moveable solution: lifting rings, castors
