

## Technical Surveillance Counter-Measures (TSCM)

### Security audit

- Search, detection and localization of listening devices and clandestine surveillance systems
- To check the absence of devices that can capture sound or image
- Mission achievable in a room, in a vehicle or on a ship
- For private and governmental clients

### Solutions

- Physical check of the environment
- Control of the communication means: exchanges, distribution frames, telephone lines
- Radio check: analysis of the electromagnetic spectrum, comparative measurements, identification of radio emissions, detection of illicit GSM emissions
