

Mobile Field Hospital

Versatile and rapidly deployable Health Care Unit for Medical Emergency Services

The solution

F.Tribet : frederic.tribet@vinci-energies.com

In brief

A solution developed with and for the SAMU (emergency services) articulated around three versions :

Description of the solution

The COVID crisis has highlighted the need for rapidly deployable commodities to reinforce and support a hospital structure without hampering / disturbing the existing infrastructure:

- **On the care level:** Increase in bed capability, setting up an isolation structure for contagious patients
- **On the administrative level:** Admission, control ...

The Mobile Field hospital is designed to provide the following to SAMU (Medical Emergency Services):

- **A capability of expeditionary or remote deployment** on catastrophes sites
- **A capability to host the public during health care campaigns:** Screening, vaccination, testing...
- **A capability to provides additional beds** in support of an existing hospital

Strengths :

- **A 100% French solution**
- A multi-purpose solution
- **Rapid deployment** in extra or intra hospital situations
- **Deployable in 1h with 4 operators**
- **Customization of the solution** possible trough options
- **A solution pre-equipped** with resuscitation and emergency equipment
- **A full-cost solution** to increase the long-term financial visibility of healthcare

Mobile Field Hospital

Descriptif

Basic unit including :

- ISO 20 ft shelter in transport configuration (shortage)
- All modes of transport (road,air,sea)
- Optional truck with hydraulic hooklift system
- Rack/body
- Implementation and maintenance training

9 customization options:

- HVAC
- Outside lighting system
- Access Airlock
- Generator
- WIFI network
- Satellite antenna
- 3G/4G antenna
- Medical oxygen distribution system
- Additional storage options

Maintenance services:

- Maintenance level 1 to 4

Training services:

- Deployment and training of technicians and operators

Capabilities

-  → **10 beds available**
-  → **Medical O2, SCOPES, Respirators,ULTRASOUND UNIT, IV, water, air conditioning, Backup power 45 mm**
-  → **INTEGRAL STORAGE of first aid and medical kits**
-  → **CONNECTIVITY : LAN, internet, SATCOM, VHF/UHF/ vidéo surveillance**
